

FIRST HAND...

Conditions Treated with Phototherapy for Better & Faster Outcomes Based on the Research and Literature:

- ✓ Arthritic pain (osteo and rheumatoid)
- ✓ Carpal tunnel syndrome (repetitive strain injuries)
- ✓ Soft tissue injuries, strains and sprains
- ✓ Inflammatory conditions (tendonitis, bursitis)
- ✓ Swelling and edema
- ✓ Wounds (post-operative, acute and chronic)
- ✓ Acute and chronic pain conditions (post-operative, neuralgia, fibromyalgia or muscle tension/spasms)
- ✓ Bone fractures and orthopedic implants

Unattended Therapy

TIME SAVINGS - faster treatment times than other light-based technologies or modalities

Build A More Competitive Practice Based on Clinical Experience:

- ✓ Use a technology that patients are willing to pay for (**Chiropractic Economics survey reports average reimbursement is \$24.00**)
Vol 52; Issue 15, October 10, 2006 9th Annual Fees and Reimbursement Survey; pages 20-30
- ✓ More referrals (patients love it due to fast treatments and better outcomes)
- ✓ Cutting edge technology advancing your treatment horizon
- ✓ Treat patients where other modalities have contraindications (pacemakers, implants and where heat is contraindicated)

MedX Provides You With All The Materials You Need To Market This Unique Treatment To New & Existing Patients:

- ✓ Detailed protocol manual for treating over 65 conditions
- ✓ Window and office posters advertising the benefits
- ✓ Patient brochures for your waiting room and treatment rooms
- ✓ CD containing research resources and released abstracts
- ✓ Physician's letter and clinician template for advertising
- ✓ Patient Testimonials

Practice Differentiator

- ✓ State of the art program allows you to market your practice attracting new patients and increasing referrals
- ✓ Build practice reputation by offering latest in medical technology
- ✓ Replace or adjunct other slower, less effective therapies
- ✓ Fast and effective outcomes
- ✓ Easy to use, comfortable treatment for both clinician and patient
- ✓ Effective in treating conditions that do not normally respond to traditional therapy interventions
- ✓ Phototherapy prepares the patient to more actively participate in treatment by quickly decreasing pain, relaxing tissue and increasing range of motion
- ✓ Patients often feel better within the first few treatments

Shorter Treatment Times

- ✓ Shorter treatment times than other modalities and other light-based technologies
- ✓ New 200mW laser accessory cuts laser treatment times by half (average treatment 3-4 minutes)
- ✓ Can be used as an adjunct therapy for unattended treatment
- ✓ Hands Free SLD Clusters

MedX phototherapy is a safe, non-invasive, drug-free treatment which speeds up your healing by up to 40% while diminishing pain.
